

# Professional Profile

Robert Flynn, P.G.  
Senior Consulting Geoscientist

Phone: 865.376.7590

E-mail: [rflynn@envstd.com](mailto:rflynn@envstd.com)

## Professional Experience

Mr. Flynn is a Senior Consulting Geoscientist with Environmental Standards, Inc., a technology-driven environmental consulting firm of more than 110 professionals. Mr. Flynn has more than 30 years of applied environmental geoscience experience working for private industry and environmental consulting and as a regulator of the oil and gas industry. He has provided investigation and facility assessment services for Fortune 500 clients and governmental agencies (US EPA, USACE, USCG, and USDOE) specializing in site assessment characterization and remediation.

As Senior Consulting Geoscientist at Environmental Standards, he is responsible for providing negotiation services and strategy advice to clients for a broad variety of hydrogeologic and environmental business issues including the development and negotiation of remediation system optimization strategies, work scopes leading to project closure, site assessment characterization strategies, and remedial action planning.

## Certifications

Mr. Flynn has presented seminars on current and proposed regulatory issues to the oil and gas industry. He has trained numerous environmental scientists on optimizing field sampling procedures. He is also an ASBOG Certified Licensed Professional Geologist in Florida and holds Professional Geologist licenses in Kentucky and Tennessee.

## Memberships

Mr. Flynn is currently a member of the National Ground Water Association, Society of Petroleum Engineers, Kentucky Coal Association, and the Kentucky Oil and Gas Association. He is a former member of the Kentucky Society of Professional Geologist, Kentucky-Indiana Geological Society, and the American Association of Petroleum Geologist.

## Education

Mr. Flynn received a Bachelor of Science Degree in Geology from the University of Kentucky in 1983.
